

JENASYS

AGENTIC BUSINESS OPERATING SYSTEM

The World's First OaaS Operating System Truly Aligned with its Clients' Success
\$0 Budget Friction | Zero Risk operational playbook asset for post-merger integrations

Private Equity

Portfolio Operations

MSP & IT Services

Enterprise

\$0 cost implementation < 7 days

"We will clear your portfolio's IT overhead, automate your entire pipeline, and add \$3.6M to each asset's EBITDA. We charge zero upfront implementation fees, and we only invoice monthly based on realized expense drops and top-line growth."

- The Catch: This is a one-time only, private invite to say yes.

Every business is drowning in data it cannot use.

↑ Data Silos

Email, CRM, docs, meetings, financials. All disconnected. No single source of truth. Even with ERP's the data is siloed in the past and just out of reach.

🕒 Slow Decisions

Executives wait days for reports that are already outdated when delivered.

↕ Invisible Leakage

Vendor overcharges, missed signals, wrong hires, lost deals... All invisible until too late.

🔄 Manual Everything

High-value people doing low-value work. Copy-paste. Status updates. Report formatting. Data processing. Handling tickets. Typed communications.

The Operating System your business has been running without.

JenaSys is not software. She's an operating layer that sits across your entire firm and portfolio... ingesting, connecting, analyzing, and acting.

Status Quo vs. Outcome as a Service

Status Quo

ERPs Lack True Intelligence

Pay upfront for a long implementations, hit budget overruns, face user resistance, use consultants, change management issues, wrapped up in a multi-year contracts with incomplete adoption

SaaS is Fragmented

Your CRM contains customers. Accounting contains financials. Slack contains conversations. Email contains decisions. Employees contain knowledge. Documents contain processes. Even with APIs, data gets over processed

The Old Way of Doing Things

Buy software that is stuck at the company level instead of at the platform level, it records work. Hire consultants. Spend forever implementing. Train everyone. Hope it works. Only see the history of what happened. This creates the sunk cost fallacy that keeps companies stuck.

Outcome as a Service

JenaSys Connects

People, knowledge, systems, processes, relationships, decisions, and opportunities all into a living business model, adding operational and strategic intelligence alongside real-time data, one-click actions, turning ownership of the knowledge and strategy to your firm.

JenaSys Understands

Contacts are inventory. Organization creates speed. Follow up multiplies deals. Good data increases accuracy. Simplification amplifies action. Efficiency reduces friction. Centralization facilitates intelligence-based decisions. Automation increases focus. Live data paired with strategic actions, finding & closing gaps beyond the system.

People are the Integration Layer

Connect your business. Learn how it operates. Improve performance immediately. Pay only from the value created.

The World's First Operating System Aligned with its Clients developed as an Outcome as a Service

Artificial Intelligence – What’s Coming?

The reason it's important to know what's coming is to understand what it means when a tool is able to maintain its own relevance at the speed of Ai.

WHY NOW

3 Irreversible forces have created a once-per-decade window

⬆️ Open Source LLMs Have Reached GPT-4 parity

This makes it possible for the first time to build a fully proprietary, self-hosted cognitive engine without API dependency or data leakage.

🕒 Enterprise GPU Saturation

Driven by remote work and AI adoption, the average mid-market company now has \$40k-\$200k in idle GPU capacity sitting on desks and laptops, creating a zero-cost compute mesh that did not exist 3 years ago.

↕️ CIOs & CFOs In Open Revolt Against SaaS Sprawl

Software spend per employee has risen 312% since 2019 while productivity gains have flatlined.

🔄 JenaSys is not merely well-timed...

It is only possible now, at this exact intersection of model maturity, hardware ubiquity, and executive desperation.

The average PE portfolio company has 7+ disconnected data systems and no unified operational intelligence layer.

JENASYS

IT'S NOT A VIBE CODED AI WRAPPER. DIVING BELOW THE SURFACE.

Autonomous Software Genesis

Data-driven tool ontogenesis, self-modifying kernel architecture, and autonomous UI/UX adaptation by user and tenant classification.

Autonomous Enterprise Mesh
Intelligence (AMEI)

Dynamic tunnel mesh protocols, idle-resource arbitration by business priority, and self-healing backup topology across decentralized endpoints.

Pre-Cognitive Automation

Zero-latency intent prediction from operational metadata, strategic annotation layers, and one-click action propagation with role-aware permissions.

Real-Time Strategy OS

Market-organization ontological fusion, operational metadata valuation underwriting and dynamic entity classification with risk/opportunity propagation.

These aren't features, benefits or functions... Four uncontested blue oceans with patent filings in progress. They are part of the IP Portfolio.

No competitor has filed in the intersection of distributed desktop mesh + business-priority arbitration + autonomous code generation + live strategic underwriting.

Transforming every employee device into a self-healing, decentralized supercomputer while autonomously generating the exact digital tools, strategic intelligence, and preemptive workflows a company needs; eliminating departments, dumb servers, and replacing static software with a living, self-evolving, enterprise organism.

The Global Fragmented Enterprise Software Market

\$487B

COMBINED TAM
Enterprise SaaS + Cloud + IT Services + Business Intelligence

\$575B in Mid-Market PE Revenue. \$69B in EBITDA. \$13.8B of EBITDA On Legacy Systems. \$8.33B in Improvable EBITDA

\$1.18B

5 YEAR SOM
0.02% TAM Capture @ \$50K - \$2M ACV

\$243M

ARR @ 24 PE Clients | 460 Portfolio Companies Year 1
82% Gross Margin

Acquiring 125 PE Clients | 2400 Portfolio Companies over 5 years

\$3.62M

AVERAGE EBITDA LIFT
For mid-market portfolio company on legacy systems with average EBITDA of \$6M could see this lift, easily.

\$506k

With Average Expected EBITDA Improvement of \$3.62M on Mid-market \$50M PE Backed Portfolio Companies. Charging OaaS at 14% delta of the EBITDA lift, the average portfolio company will yield \$506k per year, and average PE Firm with 20 companies will yield \$10M

20x-50x

Profitable AI companies are currently trading in the range of 20x to 50x EBITDA. Proprietary moats like our IP, and our MRR, NRR, and ARR from the value and stickiness of the product make it a winner.

Baseline Financial Profile & TCO Comparison

Traditional ERP

Upfront / Implementation: \$500,000-\$1,500,000
Annual Licensing: \$100,000-\$250,000
Time-to-Value (Go-Live): 9-18 months
Year 1 Total Cost: \$1,000,000

OaaS/Ai BOS

Upfront / Implementation: \$50,000-\$150,000 (OpEx)
Annual Licensing: \$120,000 (\$40/user/mo equivalent)
Time-to-Value (Go Live) 30-90 days
Year 1 Total Cost: \$220,000

\$

A

Jena Expands

Mid-Market Base EBITDA: \$6,000,000 (12%)
Operational Savings: 3% (\$1.5M Lower Costs - COGS/SG&A)
Top-Line Growth Enablement: 1% (\$500k Revenue x 12% = \$60k)
NET EBITDA EXPANSION: \$1,560,000
VALUE IMPACT at 10x EV/EBITDA Multiple: \$15,600,000

Market Penetration

M12: 1% - Beachhead Validation
M24: 3.5% - Expansion Accelerate
M36: 7.5% - Inflection Point (PE)
M48: 13% - Scale Phase (Platform)
M60: 20% - Maturity (Dominance)

Pricing

Tied Directly to Measurable Revenue Acceleration & Profit Margin Expansion Delivered by the Platform, with Target ACV if \$50K-\$2M based on company size and complexity. Gross margins exceed 80% at scale because the platform runs on client-owned hardware & a proprietary open-source LLM w/No Per-Token API Costs or Cloud Compute markup

Zero-friction setup. Jena learns you in hours, not months.

01

Browser Install

User opens private invite URL. Creates password. Accepts 2MB desktop bridge download. No IT ticket required.

02

Automatic Ingestion

Jena scans devices, reads email (one click consent), ingests documents, SharePoint, Dropbox, Box, browser data...etc.

She also creates encrypted tunnels on each device as a mesh network to balance GPU and storage, company side.

03

Avatar Construction

Builds user profile: role, workflow, tools, communication style, relationships, permissions, and access levels.

04

Gap Detection

Maps current workflow, identifies inefficiencies using Lean and Six Sigma principles. She then looks at the gaps between company vs. marketplace best of breed, user vs. best of breed, and 2nd degree relationships for signals to maximize value. Surfaces the 20% fixes that deliver 80% of gains.

05

Live Dashboard

Personalized, role-aware dashboard appears within hours. Every insight is validated, verified, and actionable.

06

Continuous Learning

Every edit, click, and outcome trains Jena. She improves autonomy level per task type as accuracy compounds.

One platform. Every user sees exactly what they need.

CEO / Managing Partner

- Market position vs. competitors
- Capital deployment velocity
- Portfolio health scores
- Strategic gaps and opportunities
- Deal flow pipeline with AI scoring

CFO / Finance

- Daily P&L validation to the penny
- Quality of Earnings in real time
- Vendor cost benchmarking
- Cash runway and covenant alerts
- Forensic anomaly flags

VP Sales / BD

- Live buyer intent signals
- AI-drafted outreach ready to send
- Contact dossiers with intro paths
- Competitive intelligence alerts
- Deal velocity tracking

HR / Talent

- Key employee flight risk signals
- Glassdoor & LinkedIn sentiment
- Hiring avatar from top performers
- Compensation benchmarking
- Culture gap analysis

Market signals delivered with strategy and a send button.

LinkedIn	Reddit	X / Twitter
Glassdoor	Indeed	Job Boards
News Sources	Facebook	Forums
Internal Data	Endpoint Data	Device Data

SIGNAL TYPES JENA DELIVERS

- 👑 Competitor posting 12 new roles → growth signal
- 👑 Key employee checking job boards → flight risk
- 🏦 Target company raising debt → acquisition window
- 👤 Lookalike client showing buy intent → outreach ready
- 🏢 Vendor alternative 23% cheaper → cost reduction
- 👤 Executive departure at competitor → opportunity

Every signal includes: What happened · Why it matters · Recommended action · One-click execution

From L0I to exit – Jena is the operating layer your portfolio needs.

✦ Underwriting Intelligence

Upload a CIM. Jena extracts financials, identifies risks, maps customer concentration, builds the 4-scenario model. Quality of Earnings in hours not weeks. Digital footprint analyzed.

🏠 Portfolio Operations

Every portfolio company gets a Jena instance. Cross-portfolio benchmarking surfaces best practices and replicable wins automatically.

🔗 Value Creation Tracking

100-day plan execution tracked to the hour. Milestone alerts before they're missed. EBITDA improvement attributed to specific actions.

✦ Exit Readiness

Continuous QoE monitoring. Clean data room built automatically. Management presentation drafted from live operational data.

🎯 Deal Flow Engine

SIG monitors 10,000+ targets continuously. Signals ranked by fit score. Outreach drafted and sent. Relationship paths mapped.

📊 LP Reporting

Automated LP reports generated from verified operational data. Quarterly packages delivered in hours. Audit-ready at all times.

Jena doesn't replace people. She makes them irreplaceable.

JENA HANDLES

- ✓ Data ingestion, validation, and organization
- ✓ Report generation and distribution
- ✓ Signal monitoring and alert triage
- ✓ Email drafting and outreach preparation
- ✓ Calendar management and meeting prep
- ✓ Vendor benchmarking and cost analysis
- ✓ Compliance monitoring and flag generation
- ✓ Repetitive workflow execution

YOUR TEAM DOES

- ★ Strategic judgment and creative thinking
- ★ Relationship building and trust
- ★ Complex negotiation and deal structuring
- ★ Ethical risk assessment
- ★ Innovation and synthesis
- ★ Empathy and emotional intelligence
- ★ Ambiguity navigation
- ★ Cultural leadership

Forensic-grade financial visibility. On demand. Every day.

Daily P&L Validation

Every transaction validated to source. Anomalies flagged before month-end close. No more audit surprises.

Vendor Optimization

Every vendor benchmarked against market. Alternative sourcing identified. Renegotiation playbooks drafted.

Revenue Intelligence

Customer concentration mapped. Churn risk modeled. Expansion opportunities identified and ranked by probability.

Quality of Earnings

Jena runs the QoE continuously. Add-backs identified, normalized EBITDA calculated, one-time items flagged automatically.

Cash Flow Forecasting

Rolling 13-week cash forecast updated daily from actual bank data and AR/AP aging. Covenant breach alerts 30 days out.

Audit Ready Always

Complete audit trail for every transaction. Data room auto-assembled from live operational data. Exit in 90 days not 12 months.

What the data says about businesses that operate like this.

23%

Average EBITDA improvement
in first 12 months of AI-assisted ops
(McKinsey, 2024)

67%

Reduction in time spent
on manual reporting
(Gartner, 2024)

3.2×

Deal sourcing velocity increase
with AI signal monitoring
(BCG, 2023)

\$1.4M

Average annual cost savings
per 100-person company
from workflow automation
(Deloitte, 2024)

41%

Faster due diligence
when AI assists in
financial analysis
(PwC, 2024)

89%

PE firms expecting AI to be
core to operations
within 3 years
(Bain, 2024)

Jena doesn't replace people. She makes them irreplaceable.

FOR PORTFOLIO COMPANIES

- ✓ Underwriting Valuation (Buy Side & Sell Side)
- ✓ Auditing Financials, Data, Security, Risks, and Gaps
- ✓ EBITDA Growth Management
- ✓ Workflow & Project Management
- ✓ Integrations Management
- ✓ Replaces IT Department
- ✓ Data, Document, and Communication Management
- ✓ Financial Modeling; LP Positions, Equity Rollover,

YOUR TEAM DOES

- ★ Strategic judgment and creative thinking
- ★ Relationship building and trust
- ★ Complex negotiation and deal structuring
- ★ Ethical risk assessment
- ★ Innovation and synthesis
- ★ Empathy and emotional intelligence
- ★ Ambiguity navigation
- ★ Cultural leadership

Performance-based pricing.

You only pay for results above where you are today.

THE GUARANTEE

Tell us your most expensive problem. We'll prove the cost down to the minute, then show you exactly where we can reduce it to, and then if we can't prove a measurable improvement in 30 days, you pay nothing. Keep the audit.

AUDIT

The First Savings Step

One-time
Full operational and financial audit. Gap analysis. Prioritized action plan. Minimum \$20K savings guaranteed. Zero Cost Implementation. Zero Risk Post-Merger Integration Play.

We're not selling software. We're betting on your results. Because our fee is a percentage of what you actually save or earn it means No Delta = No Charge. If JenaSys doesn't perform, we don't invoice.

GROWTH

\$3.6m EBITDA Lift @14% Delta

Annual
Full JenaSys deployment. Unlimited users. All integrations. Performance attribution dashboard. Eliminate IT tickets, triage, escalation, outreach, admin overhead, report costs, scheduling, onboarding, reviews, policy, multi-location P&L clarity, and missed opportunities.

HOW WE PRICE

Cost & Revenue Performance

Annual
Cost Savings: We measure what a process costs you today. We reduce it. We charge 14% of the difference.

Revenue Growth: We baseline your organic growth. Anything above it that we drive, we take a % off of that delta only.

Built to compound. Every cycle makes her smarter.

Platform Foundation

- Agentic coding | Self aware, Self Healing
- SIG signal monitoring & strategy layered
- Contacts & deal flow intel & propagation
- Reports, dashboard, and tools deployed
- Device bridges & permanent tunnels

Ingestion & Memory

- Email & calendar ingestion
- Document intelligence pipeline
- Memory compression engine
- Google & Microsoft Graph APIs
- Full workflow mapping & management

Revenue Engine

- Lead dossier builder churning value
- NLP psychological profiling
- 5-minute alert delivery
- CRM with AI scoring
- Second-degree connection neural paths

Multi-Tenant & Scale

- Per-tenant schema isolation
- White-label deployment
- Decentralized GPU network
- Proprietary LLM fine-tuned on portfolio data
- Kronos running market prediction engine

Built to be intuitive.

Dynamic to every user.

Jena — Genesis

I'm glad you're eager to help! Here are some actionable steps to improve my health score:

1. Resolve Pending Tasks: You have 3 tasks pending. Review and complete them to reduce the backlog.

2. Approve Pending Requests: You have 3 approvals pending. Review and approve them to keep the pipeline moving.

3. Address Active Gaps: There are 8 active gaps identified. Prioritize and address them to enhance system performance.

4. Monitor Deployments: Ensure the 5 recent deployments are stable and functioning as expected.

5. Optimize Agent Performance: Ensure all 9 agents are running efficiently and not overloaded.

Thank you, Jena!

JENASYS

TRADITIONAL ERP

VS

JENASYS

Traditional ERP Savings	\$1,500,000	\$1,500,000
IT Department Elimination	\$0	\$1,500,000
Marketing Cost Reductions	\$0	\$500,000
Social-Driven Revenue Lift	\$60,000	\$120,000
Total Annual EBITDA Lift	\$1,560,000	\$3,620,000

20% of the 11,500 portfolio companies are on Legacy systems, not just missing out on the EBITDA lift from an ERP, but the true enterprise value lift from JenaSys

JENASYS

EXECUTIVE TEAM

CEO

Kumar Rachuri

BIO HEADLINE

Kumar comes to JenaSys from Oracle where he led industry strategy in Northern America.

COO

John Husband

BIO HEADLINE

John comes to us from Microsoft, where he was a director over \$1 Bn of Azure.

CRO

Chris Harrell

BIO HEADLINE

Chris is the founder and creator of the JenaSys platform, coming to us from Aker private equity, where he held position of Chief Investment Officer.

CIO

Alex Bernstein

BIO HEADLINE

Alex joined JenaSys... Badass Attorney and wordsmith, a toastmaster who can toast in 8 different languages. He's going to see this slide and patronize Chris about how it looks and reads. :)

JENASYS

The operating system your business has been running without.

JenaSys is the first business operating system that only charges when it performs.
Not a subscription. Not a tool. A partner with skin in the game.

We're selectively onboarding 3-5 companies for beta. Each firm gets Jena fully deployed, fully personalized, with direct access to the founding team. The firms that move first get the deepest integration and the data advantage that compounds from day one.

Applications are reviewed by invitation only.

REQUEST A PRIVATE INVITE
